

## Laurence Diehl

Programmer

### CURRENT RESPONSIBILITY

Laurence is the programmer for the Defined Benefits (DB) Outsourcing group with the Seattle office of Milliman. He is involved in planning, designing, developing, and maintaining the software and systems for the DB Outsourcing team. In addition, Laurence is responsible for leading training sessions and is the technical support person of first resort for the team. He joined the firm in 2000.

### EXPERIENCE

Laurence has more than eight years of programming experience, working in many diverse business environments.

Laurence is familiar with a wide array of development platforms, including Access, Visual Basic, Visual Studio.NET, ASP, ASP.NET, SQL Server, and Crystal Reports. His responsibilities have included software development, web design, SQL Server administration, and report automation with several Fortune 500 companies and mail houses.
