

### Scott E. Haskell

Actuarial Analyst

#### CURRENT RESPONSIBILITY

Scott is an actuarial analyst with the Boston office of Milliman. He joined the firm in 1989.

#### EDUCATION

BA, Mathematical Economics,  
Colgate University

#### EXPERIENCE

Scott has experience in a wide variety of property and casualty actuarial work, including insurance pricing, reserving, captive feasibility studies, cost allocations, statements of actuarial opinion, probability level analyses, benchmark analyses, and financial modeling. He has assisted in the analyses of asbestos and environmental losses for a number of clients.

He has worked with clients that include:

- Multiline property and casualty insurers
- Reinsurers
- Alternative market (captives, self-insureds, risk retention groups)
- Municipalities
- State insurance departments
- Lloyd's of London syndicates

Scott has assisted state insurance departments with the examinations of several large national insurers, including risk-focused examinations. He has also assisted in the review of hundreds of rate filings for the insurance departments of Kentucky, Maryland, Mississippi, New Hampshire, and Rhode Island, including the areas of automobile, homeowners, workers' compensation, and medical malpractice.
