

Christiaan Mulder

BSC, AAG
Consultant

CURRENT RESPONSIBILITY

Christiaan is a consultant and works at Milliman's Amsterdam office. He joined the firm in 2016. Christiaan is performing missions in the Dutch market with a focus on life. He is currently working on the implementation of IFRS 17 at a large insurance company in the Netherlands, with responsibilities on architecture, data delivery and setting up the implementation plan.

EXPERIENCE

Christiaan has nine years of experience as a risk, actuarial and IT consultant. His experience is rooted in the life and risk management practice, but he is also acquainted with health. Christiaan is experienced in setting up projects that require a strong IT backbone, e.g., cash flow modelling for life portfolio's greater than 10 model points, and he is able to bridge the gap between high-level actuarial requirements and technical specifications and implementation.

Before joining Milliman, Christiaan worked for a secondment company for eight years. During this period he worked on cash flow modelling, Solvency II implementations, project management, actuarial reporting and business development.

Christiaan is experienced in programming languages (e.g. C#, Java, Python, VBA), databases (SQL), both in multithreaded and distributed programming. From his AI background, Christiaan has experience in techniques, including machine learning, in which he has given practicals at the University of Utrecht for three years.

Christiaan is fluent in Dutch and English
