

Thomas D. Murawski

FSA, MAAA
Actuary

CURRENT RESPONSIBILITY

Tom is an actuary with the Hartford, Connecticut, office of Milliman. He joined the firm in 2009.

EXPERIENCE

Tom provides consulting services to a wide variety of clients in the U.S. healthcare system including insurance companies, stop loss carriers, employers, provider groups, government entities, and advocacy groups.

Tom's focus has been on advising clients in understanding the impact and strategic implications of the ACA. His experience includes pricing health benefits, estimating reserves, and projecting financial results. Tom has led projects to assist clients in these activities for many different health products, including individual plans, small and large group plans, and stop loss products.

Tom also has significant experience with dental plan pricing for both commercial and Medicaid populations. He has been involved in studies and analyses of the impact of the ACA on dental insurance, experience analysis studies for large employers and insurers, and review of provider fee schedules.

Tom frequently presents at industry conferences and regional actuarial meetings on dental and other health benefits topics. Tom has also authored several research reports on the potential impact and implications of proposed healthcare law and regulations. He is also currently an adjunct instructor at the University of Connecticut, teaching a class in its Actuarial Science program.
