

Ryan Andersen

MCSD

Information Technology Consultant Network Administrator

CURRENT RESPONSIBILITY

Ryan is an information technology consultant and network administrator with the Seattle office of Milliman. He joined the firm in 2000.

EXPERIENCE

Prior to joining Milliman, Ryan served as an applications and database consultant working with various companies. As a consultant, Ryan was involved in planning, developing, and creating e-commerce sites, data warehouses, and distributed applications.

Ryan brings a wide variety of expertise to Milliman, including Microsoft Windows networking design and implementation, application design and development, designing programming and administering SQL and Oracle database platforms, and extensive experience with Milliman's MedInsight product.
