

Menno van Wijk

MSC, AAG
Consulting Actuary

CURRENT RESPONSIBILITY

Menno is a consulting actuary at Milliman's Amsterdam office. He performs consultancy assignments on insurance and market risk for Dutch and Belgian insurers.

Before joining Milliman in 2016, he worked as an actuary at Dutch insurer a.s.r.'s pensions department for over three years.

EXPERIENCE

Menno's main expertise is in life insurance risk, but he has performed several non-life insurance assignments as well. He is experienced in setting up Solvency II models, reports and documentation. He also has substantial knowledge of other reporting standards, such as IFRS, Dutch GAAP and (Market Consistent) Embedded value.

His previous assignments at Milliman include modeling of market risks, assumption setting for life and income protection insurance and improving deterministic cash flow models in Prophet.

He has also performed research towards mortality and longevity risk. This has led him to participate in several workgroups of the Dutch Actuarial Association concerned with mortality projections.

Menno is experienced in the software packages Office, Matlab and Prophet.
