

# MedInsight® Provider Solution

The new MedInsight Provider Solution is everything that you, as an ACO or at-risk provider, need to get the most out of your healthcare data.

All staff who focus on managing risk in your provider enterprise will have access to pre-built reports, advanced query tools, and over 20 methodologies to leverage data and effectively drive your business intelligence strategies. Also, our advanced data mart and dashboarding features—such as advanced stratification of member cohorts for population health teams, and much more—allow information to flow seamlessly for many provider use cases. And our data refresh times are industry leading, enabling organizations to have end-to-end data analysis in days, not weeks.

Milliman's MedInsight has been working exclusively with healthcare data for over 20 years; we know the use cases your organization needs to analyze, so you can focus on making changes and improvements rather than building reports. In addition, we integrate over 70 years of Milliman expertise into all of our products. As a global technology and consulting company, no one has more experience working with organizations in the healthcare industry, so our knowledge and benchmarks are unrivaled.

## Use cases

- Aggregation of claims and clinical data from multiple sources
- Provider performance management/efficiency and leakage
- ACO financial performance management
- Contract management
- Care coordination and delivery
- Patient attribution
- Risk stratification
- Quality measures and care gaps support

## Deeper dive on use cases

### AGGREGATION OF CLAIMS DATA

The MedInsight Provider Solution leverages the power of the MedInsight Data Confidence Model and Data Warehouse for more accurate aggregation and analysis. One of the biggest challenges facing providers is aggregating and formatting a variety of sources of data. That is why we built the MedInsight Provider Solution to expertly integrate claims and attribution data from multiple sources, fill in gaps, create proxy pricing, and provide a singular format for analysis. You can be confident that your data is accurate, thereby empowering MedInsight's analytics to provide you with actionable insights.

### PROVIDER PERFORMANCE MANAGEMENT/EFFICIENCY

Understanding provider performance in a network is easier than ever with the MedInsight Provider Solution. The Solution analyzes data to help you evaluate providers using quality indicators, efficiency, waste identification via the MedInsight Health Waste Calculator, as well as determine their cost effectiveness, so you can better manage the providers in your network. You can also identify network leakage and review how events or episodes are managed. Using this analysis, organizations can create specific interventions for targeted improvement.

### CONTRACT MANAGEMENT

How do you know you're getting the most out of your contracts? The MedInsight Provider Solution reports profitability and attainment of quality scores to ensure you better understand your contracts for negotiation. The Solution contains revenue and expense information for payer and provider contracts, and analyzes this to compare contract payments to actual costs. You can be sure your organization understands and makes the most from your contracts with the MedInsight Provider Solution.

## Cube Browser and Query Express and dashboards

Our ad-hoc analytic tools are now more powerful and easier to use. With the Cube Browser you can produce results from large data sets of aggregate or summary data in seconds. Query Express allows you to drill down further into detailed, claim line-level data to query on specific populations or claims experiences. And Query Express can comb through hundreds of millions of claim lines in seconds.

Customizable dashboards allow users to create stunning visuals to help tell stories and gain insights from data, while seamlessly flowing from one app to the next. We integrated one of the premier open source libraries for advanced graphing to ensure that our features are always up to date.

Have a question? MedInsight Learning is your one-stop-shop for training videos, documentation, and everything you need to know about using the Solution. This knowledge base is updated with each new release so your organization can stay current on the latest technology.
